

REMARKS

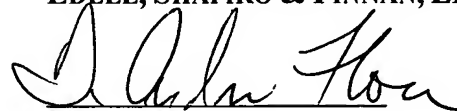

The foregoing amendment to the specification makes a minor change the specification so that the test is consistent with the figures in this application. The foregoing amendment to the text of the specification in the Brief Description of the Drawings section now groups FIG. 14 together with the brief description of FIGs. 13 and 15, which was the original intent of the specification. It is respectfully submitted that no new matter has been entered.

Dated: September 27, 2006
